9.15-10.15	1 hour session	**Winning the Security Race with Faith in Zero Trust** In the modern, hyper-connected and threat-laden enterprise landscape, organizations face increasing pressure to protect their systems and data. Traditional enterprise security models were built on an assumption that everything inside the network – whether its devices or people – is trustworthy. However, the evolution of attack sophistication and the proliferation of BYOD has brought greater risk, which means that newer, more holistic measures must be taken to ensure security across the business. This session will explore how and why Zero Trust can be used to effectively secure modern organizations from a variety of threats, along with outlining the strategic management required to get the most out of a Zero Trust architecture. Key takeaways: • Why Zero Trust can be the key to securing modern enterprises • How to effectively manage a successful Zero Trust strategy • The role that Zero Trust might play in the future of enterprise security	Michael Hill
10.30-11.30	1 hour session	**Compliance Complexities: The Ongoing Challenge** On May 25 2018, the GDPR came into force after what seemed like an eternity of build-up and preparation. Since then, complexities surrounding regulatory compliance have continued to challenge companies of all sizes. With the stakes so high, organizations simply cannot afford to fail to take compliance seriously and must manage it effectively, but knowing how best to do that can prove to be a big challenge. With the stakes so high, organizations simply cannot afford to fail to take compliance seriously and must manage it effectively, but knowing how best to do that can prove to be a big challenge. This session will reflect on the current regulatory landscape, assessing how organizations are faring in their compliance efforts, provide workable steps for being on the right side of the regulations and discuss what the next year might have in store.	Dan Raywood
